Mr. Michael Paripol Tangtrongchit, Committee chair

In country development process, the education is very important factor. If everybody in our country get enough study, they will get the better life and certainly effects to the whole system. In fact, it is impossible to make everyone get occasion. Many unprivileged children in Thailand were ignored and get not enough education. Most of them become the social problem which can not solved. This project try to present new way of teaching and learning which can provide more study in school, but they teach how to live in the social. To teach the unready children should be more the conventional method, which we are already realized that it could not work in the way of real practice. For the better life of everyone in our society, we should give them the chance.
